HAKRO 
HÄLT. SEIT 1969

WELCOME TO THE TEAM!

We look forward to inspiring you in 2020 with beautiful, well-designed and sustainable corporate fashion and to accompanying you in your work and sport, at home and out and about.

Dear Reader,

What we do, we do well. For half a century we have concentrated on the production of highly durable tops. From high-quality T-shirts, polo shirts and sweatshirts in many classic variations to exquisite blouses and shirts, innovative fleeces, easy-care knitwear and versatile jackets. We are now turning our attention to trousers with the same passion for textiles.

Last year we warmed up with our Chino trousers for men and women. Now we are taking the next step with active pants. They make their debut on page 266 of this catalogue. We'll just say this: they are genuine all-rounders and not only suitable for trade and industry. Their modern cut gives great freedom of movement and stands out with many functional details. Even the material is responsive. It consists of a light 4-way stretch fabric which can be stretched in all directions and yet still holds its shape even around the knees and pockets.

By the way, the new trousers are an example of real teamwork. The request for gear from top to toe in HAKRO quality came from you, our customers and retail partners. Thank you for this and many other suggestions. It is fun getting projects up and running together with you. We can't wait for your feedback on the first test run.

Have fun browsing, reading, choosing and discovering!

APPROACH AND VALUES

Sustainability for us means responsible conduct at all levels of our company. We are convinced that ecological and social responsibility and humanity are possible at every single point along the supply chain.

Quality loves sustainability

Our products are carefully handcrafted from high-quality materials which ensure their above-average service life. Humanity, respect and corporate responsibility have been the basis for the quality of our collection for 50 years. We intend to reinforce this focus in the future in order to become one of the most sustainable companies in our sector.

Suppliers as partners

We know exactly where and how each of our models is manufactured. For decades we have collaborated with a small circle of long-standing production partners in Europe and Asia. We engage their services throughout the whole year and purchase monthly quantities which have been agreed in advance. Reliability and continuity ensure the high quality of our collection and give our partners the planning reliability to implement good working and social conditions.

From the cotton field to the customer

Cotton is our most important resource. 24% of our models contain fibres from the cotton plant. We have set ourselves the target of gradually switching to cotton from sustainable agriculture. Since 2017 we have offered an organic collection from GOTS certified organic cotton. At the same time

we are trying to increase the percentage of sustainably produced cotton in our entire collection by up to 50% by 2022. To achieve this we are collaborating with *Cotton made in Africa*, the most important and widely accepted standard for sustainable cotton from Africa.

Climate neutrality at our company headquarters in Schrozberg

We want to keep our carbon footprint along the entire supply chain as small as possible. We have already gone climate-neutral at our headquarters in Schrozberg, with our self-generated solar power and a biogas cogeneration plant. We offset unavoidable emissions, company business trips and staff travel via *ClimatePartner*. In this way we are supporting the climate protection project: *Clean cooking stoves for families in Bangladesh*.

A living example of cohesion

As an employer we provide a good working environment and appreciative cooperation, characterised by equal opportunities, tolerance and fairness. Diversity is an intrinsic aspect of HAKRO's corporate culture.

Our team in Schrozberg comes from 14 different countries. We view individuality as an asset; we value every individual and promote inclusion.

'It is very important to us that the name HAKRO not only stands for lasting quality, but also for responsibility towards people and the environment.'

Carmen Kroll, Managing Director

TOGETHER WE STRIVE FOR GREATER SUSTAINABILITY.

As a family business it is particularly important to us to contribute as much as possible to **environmental protection and resource conservation**. We have already gone climate-neutral at our site in Schrozberg.

And we are actively involved along our entire supply chain. You can find out everything about our goals and **concrete measures** in our **latest sustainability report**. We would be delighted if you would like to download it at www.hakro.com.

CORPORATE FASHION MAKES THE TEAM.

With modern **corporate fashion** every beginning is **colourful, comfortable** and **functional**. Multitasking? No problem. Our company clothing combines **comfort** with extreme **durability**.

From stylish basics to a **complete outfit. 153 models** provide cohesion and increase the **feeling of unity**. 100% reliable, enthusiastic and experienced in **every sector**.

153 MODELS WHICH KEEP OUR PROMISES.

Durability is our underlying principle. For **50 years** we have specialised in exceptionally **high-quality clothing**. Our products last because every detail is geared towards **longevity**.

And also because they are manufactured by our **excellent production partners**, who abide by our **shared values**. Our partners guarantee **exemplary working conditions** and **good environmental standards**. Which is why we have remained loyal to them for decades.

OUR FAVOURITE COLOUR: MULTICOLOURED.

From malibu blue to wasabi green, we bring **55 intensive colours** into working life. Especially **bright, lightfast and washable**. Maximum colour-matching across all repeat orders and materials.

This is made possible thanks to our **colour management system, quality pigments, colour formulations which have been developed exclusively for us** and the latest **dyeing techniques**. You want more? We always keep your **company colour** in stock. You can reorder overnight.

THE FEEL OF QUALITY.

Packed with goodness. You can see, and above all feel, our high **quality standards**. **Cotton fibres** need to be **at least 30mm long** – this makes our fabric surfaces **particularly smooth**.

Buttons are made from **unbreakable**, extra strong polyester. Totally colour-fast branded thread is used for stitching and the **zippers** come from **YKK®** - smooth running, no getting stuck or caught and no sharp edges. That's how it should be.

ORDER TODAY FOR DELIVERY TOMORROW.

Choice of colours, requirements analysis, **placement of your logo?** Nothing could be simpler. Our **qualified dealers** know how to go shopping for a whole company. Be **inspired** and **amazed**. Waiting times are a thing of the past. **Six million** textiles are constantly ready for delivery at our **logistics centre**. All models, all colours, all sizes. We deliver within **24 hours**. Reliable, **climate neutral**, ding-dong there.

OUR SUPER POWER: MIKRALINAR®.

Exclusively developed for us, indestructible and high-performance. The **functional mix** combines the **comfort of cotton** with the benefits of a **skin-friendly high-tech polyester**. **Mikralinar®** is breathable, moisture-regulating, extremely durable, easy-care and permanently retains its shape. From now on the materials used in our **performance and high performance collection** are also included in the model name. NO. 816 / HAKRO POLO SHIRT PERFORMANCE becomes NO. 816 / HAKRO POLO SHIRT MIKRALINAR®.

Inspirations 01/2020

COLORIZED.

by Axl Jansen

Colour sequence from left to right:
017, 010, 020, 027, 026, 007, 002, 015,
005, 012, 003, 025, 001, 024, 022

More colour in daily life? Yes, we can do that. With 55 colours and the powerful images of fashion photographer Axl Jansen. Instead of grey on grey - high spirits, casualness and modernity. Rush-hour, timeline, lunch break and post work hang-out in aubergine, orange, sun, nougat and

pine. With our Inspirations photoshoot we want to show that teamwear today is anything but matchy-matchy. This time we even had an authentic overcast sky, in the middle of Berlin. Contrasts with instant effect. Cool, dynamic and motivating. Life is colourful and beautiful.

Colour sequence from left to right:

Interview with Axl Jansen

Sought-after fashion photographer Axl Jansen staged for us the theme: *Colours against the everyday greyness*. He uses 15 models in 8 images to show stages of a working day. Here he tells us his current favourite colour and why teamwork is essential for his work.

How did you get into your profession?

Through many coincidences and my love of music. I was actually in the process of becoming a musician, but my fellow musicians convinced me that I am better at taking photographs than I am at making music.

What fascinates you about your work?

I think that in my job you need to be able to do completely different things which don't necessarily have anything to do with the original job: you need to tell stories, anticipate trends, lead teams, motivate models, understand clients and at the same time be able to take photographs.

What is your view of the world as an artist?

It's my secret mission to make every day that bit more beautiful. I'm delighted when I can steer people's gaze towards the unseen and move the viewer in some way. Fashion photography can be highly entertaining.

What makes a good team?

What does it stand for?

Good teams are well-coordinated and react brilliantly to external circumstances.

As a fashion photographer you are incredibly dependent on the team. When the right people for make-up, hair and styling come together on a photoshoot, then that's half the job done for me. There are often a dozen people on the set, just to photograph a single person. Team players are a fundamental requirement for a good job.

For our photo shoot, it was the other way around for a change: the team was the subject.

Team building was needed even here. It took about half a day until every one of the 15 models reacted to small cues and the cooperation worked well. It was a bit like a football team with me as the coach.

How did you chose the locations?

I wanted to photograph urban spaces in order to portray the daily routine of a fictional colourised group of people. The places needed to be architecturally interesting and tell the story of the image together with the people. The grey background was also important of course, in order to accentuate the colourful worlds of HAKRO perfectly.

Talking of colour, what is your favourite colour?

Really you should ask what my favourite colour is at the moment, as for me it changes from season to season. Currently it is orange. I've ignored this colour for a long time, but now suddenly I'm almost in love with it.

 Consistent Sizes Garment sizes that fit properly – from XS* to 6XL	 Hangers at the hem For handling convenience in the drying tunnel**
 Colour-fast Highly colour-fast and matching in every material and textiles.	 Suitable for leasing after DIN EN ISO 15797 Easy to label with bar codes & Co.**
 Mikralinar® Innovative high-performance textile – highly durable, breathable and easy-to-care.	 Extremely durable Particularly care-resistant, heat-resistant and non-breakable buttons
 Low-maintenance Easy to wash thanks to a high level of dimensional stability and shape retention	 Easy-ironing Easy-to-iron with no tendency to crease

T-SHIRTS & LONGSLEEVES

N0. 169 / HAKRO COTTON TEC WOMEN'S V-NECK SHIRT
N0. 269 / HAKRO COTTON TEC T-SHIRT

Practical T-shirt with a classy single jersey look and neck tape. Collar seam and inside the side slits are filled with contrast fabric tape. HAKRO Cotton Tec women's V-neck shirt comes with a feminine V-neckline and a stylish, narrow neckband; the HAKRO Cotton Tec T-shirt has a round neckline. Made using a special knitting process, in which two yarns are processed into a double-face Cotton Tec material. This creates an extra-fine, single jersey surface made of long-fibre, combed and ring-spun cotton on the outer side and a mesh layer made of the functional fibre TRIACTIVE® on the inner side. As a result, the T-shirt is temperature-regulating because moisture is quickly transported to the outer side where it can evaporate. Printed HAKRO neck label for maximum wearing comfort and woven HAKRO flag label on the left side seam.

Material single jersey made of 50% cotton and 50% polyester **Finish** pre-shrunk **Properties** easy-to-clean, breathable **Recommended garment finishing** screen printing, transfer printing, embroidery

Function

N0. 214 / HAKRO COTTON TEC WOMEN'S POLO SHIRT

N0. 814 / HAKRO COTTON TEC POLO SHIRT

Practical polo shirt with a classy single jersey look, with high-quality button strip with sewn-on, extra-durable, break-resistant buttons in a colour contrasting with the lasered HAKRO lettering. With spare button and contrast neckline. Collar seam and inside of the side slits are filled with contrast fabric tape, button strip is reinforced with decorative tone-on-tone fabric tape. HAKRO Cotton Tec women's polo shirt with stylishly narrow 4-hole button strip, HAKRO Cotton Tec polo shirt with 3-hole button strip. Made using a special knitting process, in which two yarns are processed into a double-face Cotton Tec material. This creates an extra-fine, single jersey surface made of long-fibre, combed and ring-spun cotton on the outer side and a mesh layer made of the functional fibre TRIACTIVE® on the inner side. As a result, the polo shirt is temperature-regulating because moisture is quickly transported to the outer side where it can evaporate. Printed HAKRO neck label for maximum wearing comfort and woven HAKRO flag label on the left side seam.

Material single jersey made of 50% cotton and 50% polyester
Finish preshrunk **Properties** easy-to-clean, breathable **Recommended garment finishing** screen printing, transfer printing, embroidery

N0. 253 / HAKRO WOMEN'S ACTIVE JACKET ASPEN N0. 853 / HAKRO ACTIVE JACKET BOSTON

3-in-1 convertible jacket made of breathable, waterproof and windproof upper material with taped seams, detachable, warming inner fleece jacket in black (outer jacket in ink, fleece jacket in ink). Detachable hood with shield, which can be stowed in the collar. Hood and bottom hem can be tightened or loosened with tunnel drawstring and stoppers. High-quality two-way front zip fastener with double wind protection, inside pocket, two practical outer pockets with zip fastener, adjustable sleeve cuffs with velcro fastener for stepless adjustment. Inner fleece jacket with slide-in side pockets, lined sleeves, adjustable waistband with tunnel drawstring and stoppers. All zip fasteners are by YKK®. Made of durable, waterproof and windproof outer material made of two-layer laminate with TRIACTIVE®PRO technology for maximum and reliable waterproofing. Woven HAKRO neck label made of high-quality warp satin with soft, ultrasonic cut band edges for maximum wearing comfort and woven HAKRO flag label on the left side seam.

Its particular advantage: A concealed zip fastener in the inner back part (inspection opening) allows for individual customising of the jacket.

Material outer jacket made of TRIACTIVE® PRO, two-layer laminate made of fine twill fabric and inner lining made of 100% polyester; inner jacket made of microfleece made of 100% polyester **Properties** waterproof (upper material with 8,000 mm water column), breathable (8,000 g/m²/24 h breathability) **Finish** pilling-resistant inner jacket **Recommended garment finishing** transfer printing, embroidery

3 good reasons for something particularly unique: **YOUR TEAM, YOUR STYLE, YOUR BRAND.**

Welcome to your very own **personal corporate fashion world**. From your own label and individualised details to all-new cuts and colours developed in cooperation with you. There's nothing that can't be done. Be inspired by the customised HAKRO **Private Label** concept.

Clothing as individual as your company.

THE HAKRO PRIVATE LABEL SERVICE

Your company is unique. Show that it is! With your company’s own collection. We are at your side from A to Z. It’s easier and less expensive than you may think – and is even worth it from about 100 members of staff.

It all starts with the authorised HAKRO dealer. Whether company, club or local authority – an individually created collection is always a good investment. It fosters team spirit and signals a common bond, a shared identity and high regard. Your Private Label collection will be developed in close cooperation with your HAKRO dealer. They will give you expert, focused advice on all matters concerning every aspect of materials, colours, cuts and finishes. As soon as all of your wishes and requirements have been taken into account, these will provide the basis for creating the design. Once everything meets your expectations, we will work out what the cost of production will be and give you a quotation.

The big moment. Six to eight weeks after placing your order you will receive the first

production samples in original quality with all processing details and finishes. Only when you are happy with every detail, however small, do we start production under the stringent criteria of HAKRO’s quality management system. Including final inspection before shipping.

Guaranteed HAKRO quality. In every single phase, you benefit from our decades of experience in manufacturing high-quality textiles. We only work with our tried and proven partner companies. This way, we can make sure that your individually designed collection is sustainably produced in certified HAKRO quality and meets our high standards in every respect.

The alternative: modified existing products. Faster and, in most cases, also less expensive than a completely independent collection are modified designs based on specific items from our existing range of products. A special colour, your own label or an additional pocket, they are all quick to produce and give your clothing an individual touch.

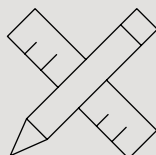

1. Idea & advice

Your HAKRO dealer will help you develop your individually created collection or modified existing design. Will take up your ideas and wishes, provide you with expert advice and show you options and alternatives.

2. Design & development

Attention then turns to creating the actual product. Your requirements profile provides the basis for developing tailor-made, well-functioning options that go perfectly with your company or organisation.

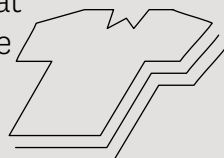

3. Sample & approval

This is when the work for the sewing department begins. Samples are made of the collection or the modified standard product that is planned. Once you have examined them and given your approval, production can begin.

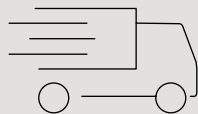

4. Production & finishing

Fabric production, fabric finishing and manufacturing are all done with certified partners under a stringent regime of quality control. On a guaranteed sustainable basis and – as is customary at HAKRO – in compliance with all standards.

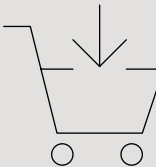

5. Logistics & service

Our modern logistics centre ensures that your items are shipped out on schedule. The goods reach you on time, neatly packed and clearly labelled.

6. Follow-on orders & service

Do you need additional supplies? We deliver products in reliable colour consistency and also give you the option of extending your collection with additional basics or further items created specifically for you.

UNIQUELY EXCLUSIVE.

Your own designs

Laser-engraved buttons, unusual zip fastens, your own labelling, customised accessories – create your own unmistakable look. There are so many options.

Customised materials

Make all the difference – with materials developed and produced specifically for you. Needless to say, in tested HAKRO quality in compliance with our standards and demands.

Customised cuts

You would like your collection to have a cut of its own. That's not a problem at HAKRO either. Simply talk to your specialist dealer. He will be pleased to be of further assistance.

Your own colours

Show your true colours! For example, with a collection or custom-made product in your corporate colour. We ensure colour-fastness and guarantee long-lasting pleasure.

Little extras, huge impact:
Our selected accessories are visual
cherries on the cake. They complete
the look – for an individually tailored,
perfectly coordinated image.

* Please note that for technical reasons the colours shown here may differ somewhat from the actual colours of the garments.
Below every colour sample you'll therefore find details of the PANTONE and TCX colour codes that match the HAKRO shade most closely.
These details are only for guidance and should not be relied on for accuracy.

OUR SIX COLLECTION LINES

153 models. Unlimited variations.
From essentials to business looks.
For large and small. Always close
to life. Always perfect in every detail.
Have fun discovering for yourself.

<h3>ESSENTIALS</h3> <p>Perfect clothing solutions for teams and companies. Our Essentials line is available in every imaginable favorite colour and is a must for every wardrobe. The particularly high cotton component caters for pleasant wearing comfort.</p> 	<h3>PERFORMANCE</h3> <p>Our Workwear line caters to demanding working conditions. The durable models are made using our Mikralinar® functional mixture and are ideal for commercial laundering. You need even more performance? Our High Performance models take durability to a new level.</p> 	<h3>FUNCTION</h3> <p>Our functional (polo-)shirts, fleece models, vests and jackets are your ideal companions for wind and weather. Thanks to special function yarns, clever material constructions, high performance membranes and a whole host of other practical features, you are always well equipped for the elements.</p> 
---	--	--

<h3>BUSINESS</h3> <p>The Premium collection for the stylish look – not just on the executive floor. Our blouses, shirts, pullovers, cardigans and blazers of finest cotton and cosy merino wool are reliable partners in the everyday business environment.</p> 	<h3>ORGANIC</h3> <p>Our Organic collection line is made of 100% cotton (organic) and is certified according to the leading standard worldwide for the processing of textiles from biologically produced natural fibres (GOTS-Label certified by CE-RES-0388).</p> 	<h3>KIDS</h3> <p>No matter whether for school or club – our classics for kids not only look incredibly good, but are also almost indestructible. Ideally made to fit little globetrotters who like to play. Available in sizes 116-164.</p> 
---	---	---

FOR THE PLEASURE TO LAST

HAKRO HÄLT. SEIT 1969. Why do our garments still look like new even after years and years of intense use? What makes our products so different from those of other brands? What is so particular about the HAKRO quality? There is no simple answer to that, but ten good reasons.

1. IDEAL SIZES & FIT SELECTION

3 Fits
Body Fit, Regular Fit or Comfort Fit. Optimal freedom of movement, certified shape retention.

16 Sizes
Sizes from 116 to 6XL for kids, women, men or unisex.

153 Models
Huge selection, all-round carefree package.

2. COLOUR SELECTION

55 bright colours
Brightness colour-recipes with the highest colour fastness.

Colour quality
Colours are the same for all materials. Colour retention during washing, even up to 95°C.

Colour Management
Easy reorder of the same colour tone, thanks to HAKRO colour management.

3. OPTIMAL UPGRADING TREATMENT

Transfer print
Makes possible the finest colour gradients.

Silk screen print
Diverse creative possibilities and ideal for large volume orders.

Embroidery
Probably the most elegant and long-lived form of upgrading treatment.

4. HIGH-QUALITY MATERIALS

Natural fibres
As a matter of principle, we only use first-class, long staple (organic) cotton or finest merino wool.

Functional fibres
We process functional fibres which are breathable, insulating, offer temperature control or protective characteristics against moisture and wind.

Powerful fibres mixes
Like, for example, the powerhouse Mikralinar® mix developed especially by us.

5. PERFECT FABRIC DESIGN

High-quality fabric production
Whether it be single jersey, interlock, piqué or woven.

Ideal textile weight
Fabric suitable for every type of use.

Optimal surface finish
For perfect appearance and optimal upgrading treatment.

6. INTELLIGENT SEAMS

Tough seams
Extra elastic seams. Up to 20% higher resistance to tearing. 29 seam types - the optimal type of stitch for every seam.

Yarn quality
Best quality branded yarns.

Particularly durable
Carefully sewn plackets and buttonholes. Buttons sewn using a lock stitch method (cross-stitched).

7. BEST (BRANDED) COMPONENTS

Branded fibres
Use of high-quality branded fibres such as LYCRA®, COOL-MAX® PRO and TRIACTIVE®.

Unbreakable buttons
Particularly durable, shape-retentive and tough.

Eyelets & zippers from YKK®
Practically free of running noise, particularly durable and nickel-free.

8. DURABILITY (WASHING) DURABILITY

Lasts longer
Tear resistant, shape and size-retentive as well as colour-fast - long service life, well above average.

Finishing
Anti-pilling, odour-inhibiting, easy-care, non-iron, preshrunk.

Easy care
Suitable for commercial laundering in accordance with DIN EN ISO 15797 and DIN EN ISO 30023.

9. SEAMLESS QUALITY CONTROL

Material control
Elaborate controls at every step in the production process.

Colour control
Colour uniformity for all fabrics thanks to colour management.

Final inspection
Everything checked and certified according to STANDARD 100 by OEKO-TEX®.

10. EASY PERSONALISATION

Favourite colour
An article is not available in your favourite colour? No problem.

Your own cut
We will fulfil your favoured size requirement.

Your own collection/brand
Create your own look.

INFORMATION

SIZE & FIT

Three fits, 153 models and sizes to fit every-body. In order to find just that perfect fit, we recommend: Try it on! Your authorised HAKRO dealer will provide you with the corresponding sets of sizes. He is looking forward to your request and is ever ready to assist you with anything you might need.

WOMEN'S* International sizes German sizes	2XS 32/34	XS 34/36	S 36/38	M 38/40
MEN'S* International sizes German sizes Collar size in cm		XS 44/46 35/36	S 46/48 37/38	M 48/50 39/40
KIDS* International sizes Age		116 5-6	128 7-8	140 9-10
TROUSER* International sizes Male waist in inch Male length in inch	2XS 29/30 32	XS 30/31 32	S 31/32 32	M 32/33 33
SOCKS* International sizes Shoe size			S 35-38	M 39-42

Collar size. An additional measurement for shirts. You can check this by measuring your neck just below your Adam's apple – very carefully, of course!

Kids. Every child is unique, of course. The age indications should therefore be seen simply as a rough guide. Note that kids' sizes correspond to height measurements in centimetres.

COMFORT FIT
A loose-fitting, comfortable fit with excellent freedom of movement.

REGULAR FIT
Traditional fit, with slight tapering and adequate freedom of movement.

BODY FIT
A modern more closely fitted style, with a slim profile and a gently tailored cut.

L 40/42	XL 42/44	2XL 44/46	3XL 46/48	4XL 48/50	5XL 50/52	6XL 52/54
L 50/52 41/42	XL 52/54 43/44	2XL 54/56 45/46	3XL 56/58 47/48	4XL 58/60 49/50	5XL 60/62 51/52	6XL 62/64 53/54
152 11-12	164 13-14					
L 33/34 33	XL 34/35 33	2XL 35/36 33	3XL 36/37 33			
L 43-46						

*All measurements and sizes are provided for guidance only. Because of the way we optimise the fit, actual measurements may differ slightly. That's why it's best to visit your HAKRO dealer to try on the items.

CERTIFIED AS A MATTER OF CONVICTION

What is behind seals of approval such as STANDARD 100 by OEKO-TEX® or Cotton made in Africa? An overview and explanation of our most important certificates.

	<p>UNITED NATIONS GLOBAL COMPACT</p> <p>In 2009, HAKRO became a signatory of the <i>United Nations Global Compact</i>, thus joining the world’s largest alliance for responsible trading. The ten principles of the Global Compact set standards for compliance with human rights and the implementation of international labour principles, for environmental protection, for taking action against child labour and for preventing corruption. Each year we issue progress reports on the actions we have taken in support of the ten principles.</p>
	<p>TEXTILE PARTNERSHIP</p> <p>As a member of the <i>Partnership for Sustainable Textiles</i>, HAKRO has committed to take active steps to implement the Partnership’s overriding goal: to enhance the social, economic and environmental conditions along the entire supply chain of the textile and clothing sector in a demonstrable way.</p>
	<p>BUSINESS SOCIAL COMPLIANCE INITIATIVE</p> <p>As a <i>amfori BSCI</i> member, since 2012 we’ve been taking action to significantly improve working and social conditions at our production facilities. We require our suppliers to comply with the provisions of the BSCI Code of Conduct. These set standards in terms of management practices, working hours and pay levels, the banning of child labour, freedom of assembly, avoidance of discrimination, and workplace health and safety. Independent inspectors carry out local checks to ensure that our production partners are adhering to the Code.</p>
	<p>ACCORD</p> <p><i>Bangladesh Accord</i> established after the collapse of the Rana Plaza textiles factory in 2013 with the aim of preventing such a tragedy from ever occurring again. The agreement between trades unions and global textiles companies ensures that fire prevention measures and safety standards are observed in Bangladesh. We first supported this important measure by signing the first <i>Bangladesh Accord</i> in 2015 and again by renewing the agreement in 2018.</p>

	<p>STANDARD 100 BY OEKO-TEX®</p> <p>The „Trust in Textiles“ symbol indicates compliance with STANDARD 100 by OEKO-TEX®. This is an independent testing and certification system covering raw materials, secondary materials and end products at all stages of textile processing. The tests involved cover substances that are banned or regulated by law and those that are known to be damaging health. Every HAKRO garment is labelled with this quality mark.</p> <p>As part of the product certification process for STANDARD 100 by OEKO-TEX®, we guarantee that all substances used fulfil the requirements of the European chemicals regulation known as „REACH“ (Registration, Evaluation, Authorisation and Restriction of Chemicals).</p>
	<p>GOTS</p> <p>The <i>Global Organic Textile Standard (GOTS)</i> is the leading global standard for processing textiles from organically produced natural fibres. It sets down environmental requirements covering the entire textile production chain and specifies compulsory social criteria. The T-shirts and polo shirts in the HAKRO Organic Collection are made of 100% organic cotton and are certified in line with the Global Organic Textile Standard (GOTS).</p>
	<p>COTTON MADE IN AFRICA (CMIA)</p> <p>This initiative supports African cotton farmers and their families. Instead of relying on donations, it involves the activation of market forces and therefore plays a vital role in promoting self-reliance. HAKRO is a member of a network of companies that purchase via the CmiA („<i>Cotton made in Africa</i>“) scheme, supporting agricultural training courses and social projects through licensing fees.</p>
	<p>BLUESIGN® SYSTEMPARTNER</p> <p><i>bluesign® system</i> is a holistic initiative of the textiles industry that aims to promote sustainability along the entire supply chain. All participating companies – from chemical suppliers to manufacturers to brands and retailers – have to undergo strict testing. The aims are the economical use of resources, minimisation of the environmental impact and the promotion of innovations. We have been a <i>bluesign® system</i> partner since 2009.</p>
	<p>ISO 9001 – SYSTEMATIC QUALITY</p> <p>HAKRO’s quality management system has been certified as compliant with the <i>ISO 9001</i> standard by TÜV Süd in Germany. <i>ISO 9001</i> is the most important domestic and international standard in the field of quality management. It forms the basis for our continuous internal improvement process.</p>

OUR COMPACT TEXTILE COMPENDIUM

Conveying comprehensive background information on anything textile: our compact HAKRO compendium explains many terms of typical textile lingo in a concise and illustrative manner. Yet, if there are still questions, we will be glad to help.

BREATHABLE A fabric can be said to be breathable when the material is capable of wicking water vapour from the inside to the outside. The breathability level is specified by the garment's MVTR (moisture vapour transmission rate). This describes the amount of water that can vaporise through one square metre over the course of 24 hours. The greater the amount, the higher the breathability rating for the garment.

“NON-IRON” LABELLING Shirts and blouses with a “non-iron” label are easy-to-care for and can be worn straight after being washed and dried. To assist with this, you should take the garment out of the drier when it's still slightly damp and allow it to dry off on a clothes airer.

COTTON The quality of a particular variety of cotton depends mainly on the fibre length. In the textile industry, this is known as the “staple length”. The longer the fibre, the finer and more hard-wearing the cotton. HAKRO uses only long-staple, combed and ring-spun cotton.

CLEVER CARE This is an initiative of the International Association for Textile Care Labelling (GINETEX) related to the topic of washing, drying, ironing and professional textile care.

COOLMAX® PRO A high-tech functional fabric belonging to the Invista brand that optimally regulates body heat. Its special 4 or 6-channelled fibres wick moisture directly to the surface of the material, where it evaporates extremely quickly. For maximum wearability, in our products we use only the most effective variant, known as COOLMAX® PRO.

COTTON TEC is a double-faced material in which the exterior is made of unusually fine cotton and the interior consists of the functional fibre TRIACTIVE®. Because the fabric rapidly wicks moisture to the outside of the garment, it has a temperature-regulating effect.

PRESHRUNK is a thermo-mechanical textile treatment. It ensures that the garment is slightly shrunk within specific tolerances.

INTERLOCK This is a stretchable, double-sized mesh fabric that only shows the correct meshes on both sides of the material.

JERSEY A fine mesh fabric for use in outerwear in single or double grades.

BUTTONS HAKRO buttons are made of break-resistant, 3 mm-thick high-performance polyester. They are attached for very long-term use by means of a special lock-stick process.

VAT DYE A dye which exhibits essentially no solubility in water. For this reason, vat dyes always find application when extremely high demands are made on the dyeing process. Clothing dyed using vat dyes is boil-proof, bleach-proof and colour-fast.

LYCRA® This high-quality variety of elastane or Spandex, belonging to the Invista brand, is extremely stretchable and able to retain its shape.

MEMBRANES IN TEXTILES A membrane is a special film that is firmly attached to the reverse side of an outer fabric layer. Membranes help ensure the garment is comfortable and can contribute to the breathability of functional clothing. They provide protection from external moisture while allowing gases in the form of water vapour to escape. In comparison to fabric coatings, membranes are robust, tear-resistant and consequently longer-lasting.

MULTI-LAYER LAMINATES All coats and jackets that are equipped with a membrane consist of at least two layers of different materials. In 2-layer laminates, the interior of the jacket is provided with an additional lightweight lining, which prevents direct contact with the membrane. In 2.5-layer laminates, the membranes

are protected with an additional printed coating. In 3-layer laminates, instead of the printed coating, a further layer of fabric, such as microfleece or mesh, is added to the membrane. This third layer makes the multi-layer laminate particularly hard-wearing and makes the garment very comfortable to wear. Multi-layer laminates are 100% waterproof provided that the seams are treated after assembly with an additional tape seal. Without this additional sealing process, multi-layer laminates are merely water-resistant.

MERINO WOOL The Merino wool used by HAKRO is especially fine, doesn't scratch, has a soft feel, an even mesh pattern and offers high levels of comfort for the wearer. It can be washed at 30 °C.

MICROFLEECE This very thick velvety material, made from 100% polyester, is extremely lightweight, warming, wind-resistant, elastic and wearable. Micro-fleece garments from HAKRO are particularly easy-to-care for and are also provided with an additional anti-pilling facility.

MIKRALINAR® This functional, skin-friendly blend has been specially developed for HAKRO to combine the benefits of cotton with the strengths of a special high-performance polyester. It is effective at absorbing moisture and rapidly wicking it away from the skin. Materials produced from MikraLinar® are particularly hard-wearing, tear-resistant and good at retaining their shape. Because of their high breathability, they are also very comfortable.

PIMA COTTON This is an unusually high-quality variety of cotton with long, firm fibres. Garments made from Pima cotton have a smoother surface, are easy to handle and unusually soft.

PIQUÉ Is a fabric with alternately slightly elevated and recessed points, thus conferring a stitched appearance on the fabric. Piqué is a classical material for polo shirts.

POLYESTER FABRICS are tear-resistant, lightweight and absorb almost no moisture. Moreover, they offer a well-balanced ratio between insulation, moisture transport, tear and abrasion resistance. This is why they are presently the fabrics most often used for functional and sportswear. Since Polyester fibres are manufactured synthetically, there is a large range of various fibres to choose from for every requirement on the product. The properties demanded of the fabric differ widely and impact on the function, the moisture transport and the wearing comfort of the garment.

PRO LABEL is a sign marking the suitability of a product for professional textile care. It contains instructions pertaining to the standardised washing and drying procedures as applied in commercial laundries.

ZIPPERS HAKRO uses quality zippers made by YKK® which ensures that you may open and close your zipper umpteen times without breaking even one tooth.

RIPSTOP Extremely tear-resistant fabrics that are woven using a special technique. Thicker threads are interwoven with the otherwise thinner material at regular intervals. This makes the weave especially stable and resistant to tearing.

SOFTSHELL involves the combination of an external and middle layer of clothing in a single product. Such garments have a smooth outer layer, are windproof and water-resistant. Inside, they have a soft surface and are comfortable to wear.

Softshell coats and jackets are elastic and ideally suited for use as workwear thanks to the freedom of movement they offer.

SOFTSHELL LIGHT is a breathable, hardwearing, water-resistant and windproof material consisting of a lightweight 2-layer softshell reliant on TRIACTIVE® PRO technology. It's suitable for use in all indoor and outdoor activities.

STRETCH The addition of LYCRA® enhances the stretch qualities of fabrics, thereby improving the freedom of movement and the comfort of the garment.

KNITTED FABRIC apparel is, in comparison to woven or tubular knitwear thicker, heavier and better insulating. Making meshes by means of one thread or yarn and two or more needles yields an elastic purl/knitwear.

SWEAT AND LINING FABRIC This is a knitwear fabric with homogenous surface, usually a tubular knit, with a soft lining thread integrated in such a way that it remains invisible thanks to a cover thread on the outer side. The readymade fabric displays evenly knitted meshes on the outside while the inside can be strongly brushed pile. The inside brushing of sweatware may lead to fuzzing which, however, will cease after several washings.

TEXTILE PERSONALISATION Customisation of products, for example by means of embroidery or printing, is known as "personalisation". Standard options include the placing of a logo on the front or rear of an item. HAKRO clothing is perfectly designed for subsequent personalisation. Thanks to their unusually smooth finishes, they allow for excellent and long-lasting results.

TEXTILE WEIGHT The textile surface weight is the weight in grams per square metre of a fabric. It represents an important indicator of product quality.

THINK GREEN – WASH AT 30°C Nowadays, washing at 30°C is perfectly sufficient. Washes will still come out clean as today's detergents are effective even at low temperatures. The bonus for the environment is that washing at 30°C will save up to 40% electricity. This is why HAKRO has launched its "THINK GREEN – WASH AT 30°C" campaign. We hope you take part, too!

TRIACTIVE® This high-quality functional fabric helps wick moisture more quickly to the outside thanks to the multi-channel technology used in the special thread design, making it ideal for activities involving high levels of perspiration.

TRIACTIVE® PRO refers to a waterproof and windproof fabric that is permeable to water vapour. HAKRO uses TRIACTIVE® PRO in all situations where the clothing needs to offer very good levels of breathability, permeability to water vapour and waterproofing.

WASHING AND CARE INSTRUCTIONS All HAKRO products are provided with specially devised care guidelines. Please pay careful attention to these.

WATER COLUMN This is the measurement unit used for the density of fabrics. The water column indicates how much water can remain on the material before it lets in moisture. A one-metre water column corresponds to approximately 0.098 bar. Garments with a water column of 1300mm or above may be considered as waterproof.

WINDPROOFING Windproof clothing is designed to prevent the wearer from quickly losing heat as a result of the wind. The higher the wind speed, the colder the temperature experienced. This means that an external temperature of -1° will feel like -21° C in wind speeds of 40 miles per hour. This "wind chill" effect can be countered by wind-resistant clothing.

ZIP-IN SYSTEM The ZIP-IN SYSTEM allows 3-in-1 coats and jackets to be combined in line with the customer's preferences. For example, a light and warm loft jacket may be combined with a breathable and watertight active jacket. The coats and jackets are available in a variety of colours and can be worn either on their own or together. Thanks to their versatility, they are suitable for all kinds of uses all year round.

YARN HAKRO uses only high-quality yarns from reputable branded manufacturers. To produce such yarns, threads are refined. In other words, a minimum of two or more threads are twisted together, with the number of twists determining the level of tear-resistance and therefore the durability of the seams.

The following pages present an overview
on all shades available for our models.

A woman with dark skin and short dark hair is wearing a bright blue hooded sweatshirt. She is pulling the hood up over her head with both hands, looking directly at the camera with a slight smile. The background is a plain, light color.

Qualified competent dealers.

THE BEST OF THE BEST.

At HAKRO, service is still a matter of trained competence and personal trust. That is why our textiles are only available from authorised HAKRO dealers. Because they always find out first-hand what our customers want, we also find out first-hand where there is a need for optimisation. Which means we get better and better. A good deal for everyone.
